

# Synfioo – answering the “where” And “when” in intermodal logistics

Plan your operations in detail and always be informed when your rail transport is delayed.  
Keep everyone involved up to date with reliable information on your shipments.

**With Synfioo, you get all this.  
Make decisions at the earliest possible stage with maximum visibility.**

#### **FACILITATE PLANNING:**

Always know exactly where your rail transports are and when something happens on the way.

#### **IMPROVE LOGISTICS PROCESSES:**

Keep your fleet organized with precise arrival time predictions even of pre- and post-carriage.

#### **SAVE MONEY:**

Precisely time your disposition at an early stage to avoid fines and utilize resources optimally.

#### **INCREASE CUSTOMER SATISFACTION:**

Provide your customers with accurate information about their shipments.

## LET US DIGITALIZE YOUR LOGISTICS PROCESSES:

1.

Synfioo platform processes all European freight train data and connects it with your individual data.

2.

We process current tracking data, live situation on the entire European rail network and historical data to calculate precise predictions.

3.

You benefit from precise ETA predictions and a detailed view of all trains.
